

Working With Educators Around the World

equipment for educators™

For over 60 years, Virco has been providing schools with quality products and services in the U.S. and throughout the world.

From Humble Beginnings

Virco first opened its doors in Los Angeles on 2 February 1950 as a business dedicated to providing durable, innovative furniture and exceptional service to schools in the post-World War II era. At that time Virco had only one client: the Los Angeles Unified School District.

Today, powered by our modern, efficient domestic factories, Virco's operations are still going strong. With a 52,025 square-meter headquarters facility in Torrance, California and over 185,806 square meters of operational space in Conway, Arkansas, we're exceptionally well positioned to serve you. And – over 60 years later – Virco is still the primary supplier to America's second largest school district, Los Angeles Unified.

Managed as a sustainable business with long-term objectives, Virco's diverse, evolving products and services are making us the supplier of choice for educational, institutional, and hospitality venues throughout the world.

A World-Wide Presence

International projects are a Virco specialty! While many people recognize us as North America’s school furniture and equipment leader, we’re equally proud that Virco products have been purchased by customers in 75 countries worldwide.

Virco’s state-of-the-art U.S. factories give you an exceptional range of products to meet your curriculum needs, teaching styles, and budgetary requirements. We also give you the best combination of colors, finishes, and lead-times in the industry.

Virco's Conway Plant 2 has dock doors for 108 trucks at its 74,322 square-meter distribution center. There are two additional facilities in Conway, Arkansas.

Solutions for International Customers

KD Shipping Program

Virco's KD shipping program enables our international dealers to order Virco components from our U.S. factories for local assembly. This innovative program saves on shipping costs by reducing the cubic dimensions of products, sometimes requiring only one-half the normal container space. Additional benefits include: support of the local economy by utilizing local labor for final assembly; lower product costs; potential tariff and tax savings; and the ability to sell more colors and options to your customers.

Rust-Inhibiting Paint

We live in a diverse world with differing climates and seasonal patterns. And just as buildings throughout the world are designed with local climatic conditions in mind, school furniture can be adapted to the needs of a region or country, particularly where rust is a problem for steel-frame furniture.

With sales to customers in 75 countries, Virco's steel-frame furniture products are available with a specially formulated rust-inhibiting powder coat paint that's great for non-climate-controlled schools in wet, humid or seaside areas. Just specify RUST GUARD and we'll take care of the rest.

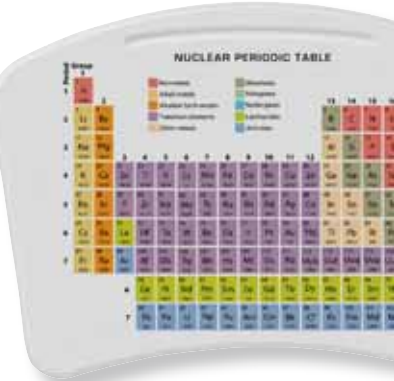

Products Backed by Virco's 10 Year Warranty

All Virco products are covered by our 10 year limited warranty. You can feel secure that when you purchase from Virco you are getting the very best furniture and equipment, made in our U.S. factories, tested to industry standards for strength and durability, and backed by Virco's 10 year limited warranty.

Custom Hard Plastic Logo Top Program

With custom-imprinted hard plastic desk tops, your classroom furniture can really make a statement! Virco's advanced compression-molding technology now enables us to embed logos and other artwork directly into our proprietary Fortified Recycled Wood™ hard plastic work surfaces. Now you can customize desk tops with your school's logo as an expression of school spirit and pride, or you can enhance work surfaces to highlight curriculum offerings and inspire students. The possibilities are virtually limitless!

In 2009, the Panamanian Ministry of Education selected Virco to provide furniture for the country's schools. After deciding to standardize on the popular 9000 Classic Series™ tablet arm unit, Virco customized the desktops with the department's logo.

Above is a staging area at Instituto América as furniture arrives from the U.S.
